

PREMIUM range

DISHWASHERS AND GLASSWASHERS UNDERCOUNTER

The new technology of the PREMIUM range will lead you in an easy and intuitive way through the functions of your dishwasher. The soft-touch panel with the multicolour button and the LCD board shows clearly the working temperatures, the washing cycles and the functions in use. Thanks to its self-diagnostic system it notifies any anomaly. The innovative rinse circuit, the six washing cycles including clean water cycles and standard cycles, the high quality performances, the possibility to easily modify their voltage make these machines extremely competitive and versatile.

FEATURES:

- Savings on water, detergent and energy consumption, thanks to the innovative PLUS rinse-system.
- Partial drain of the waste water before rinsing, to avoid any waste of detergent and energy.
- New concept of thermo-chemical sanitization, effective even at low temperatures.
- PREMIUM 40 / PREMIUM 50: 6 wash-cycles, 4 with partial waste-water drain and 2 Clean Water with total waste-water drain before rinse.
- PREMIUM 50 UV / CUTLERY UV: 9 wash-cycles, 2 Clean Water with total waste-water drain before rinse (1 of them with UV water disinfection) + 3 normal with water recycling (1 of them with UV water disinfection) + 4 cycles with pre-washing (2 of them with UV water disinfection);
- Multi-chromatic START key.
- Electronic control panel with LCD screen.
- Language selection of the menu control.
- Self-diagnostic system.
- Easy-change voltage setting, directly from the cables connection.
- PLUS system with booster pump, for an excellent final rinse.
- Standard detergent and Rinse-aid pump.
- Built-in drain pump.
- Thermo stop with Energy Saving device.
- Quick tank-heating.
- DVGW Non-return valve, preventing water back-flow.
- Deep formed and rounded tank to optimize hygiene and ease cleaning operations.
- Softened water version with continuous automatic self-regeneration.

COLOR Codes:

The innovative multi-chrome and backlit START button, thanks to the MULTICHROME and FLASHING functions, clearly shows the functions of the new PREMIUM range.

Each colour shows an operation status:

- WHITE: Setting/Programming.
- RED: Loading and heating.
- RED FLASHING: Alarms.
- GREEN: Ready to work.
- GREEN AND BLUE BLINKING: Cycle ended.
- BLUE: Washing Cycle running.
- FLASHING: Boiler total drain.
