

Choice of 4 sizes

Choice of 4 functions for different applications

Key Benefits & Features

Maximum ease-of-use

- Touch screen as control panel
- Hygiene data log
- Operation data log
- Pre-set special programmes

Maximum service friendliness

- Error management system
- Menu-driven commissioning
- Easy access to internal parts

Maximum cost-efficiency

- Low rinse water consumption
- Energy versions
- Eco programmes

Best washing results

- LGA (TÜV Rheinland, Germany) tested
- VarioPower wash system
 - 4-fold filtration system
 - Customized wash programmes

Maximum ease-of-use

Initial start-up	2009-04-10
Next service in	3500 h
Total operation hours	1030 h
Total washing cycles	3900
Total water consumption	13700 l

Operation data log

Special functions and programmes

Setting of automatic start-up

UC Series offers maximum operation convenience by:

- ✓ State-of-the-art control panel consisting of a touch screen and a start key with progress bar. This offers a range from single-button operation up to special customized wash programmes.
- ✓ Correct wash programme can be selected, depending on the wash items and soil levels, by touching the corresponding symbol on the screen.
- ✓ The UC Series stores programmes with ideal settings for specific wash processes.
- ✓ Four factors vital for good wash results, - cycle time, temperature, chemical dosing and wash pressure are adjustable for each wash programme to ensure **optimum wash result and protection for different wash items.**
- ✓ **Hygiene data log** enables easy monitoring of machine performance and data recordings.
- ✓ **Operation data log** provides accurate readings of total operation hours, water consumption and no. of wash cycles etc., easing cost management process.
- ✓ **Special pre-set programmes** such as Eco, silent, short, descaling, basic-cleaning and intensive, can be easily activated. The machine adjusts automatically all parameters to meet special dishwashing needs.
- ✓ **Time-controlled automatic start-up** helps to eliminate waiting time.
- ✓ **Clear error communication via symbols** and acoustic signals enable quick identification of problems at operator level.

Maximum cost-efficiency

Energy required to heat up the rinse water

UC Series offers maximum efficiency by:

- ✓ **Economical pre-set rinse water amount of 2.4 l/cycle**, and the possibility to reduce the rinse water amount for each wash programme.
- ✓ **ECO-programmes reduce running costs by approx. 11 %**. Wash cycles are extended, while the machine saves on energy and chemical costs.
- ✓ **Energy** versions: equipped with a **patented heat recovery system** is the most efficient model.
- ✓ In **Energy** versions, steam generated during rinsing is aspirated and cooled in an integrated heat exchanger. The heat energy of the steam is used for **preheating of cold incoming water**.

- ✓ The air which is now cooled and dried, is then channeled back onto the wash items producing an enhanced drying result. Due to **self-drying**, the rinse temperature in **Energy** models is reduced from 85 °C to 65 °C, in case of dishwashing.
- ✓ The **double-saving effect** of **Energy** models ends with a **total saving of 0.1 kWh per wash cycle** for dishwashing programmes - an estimated **20% savings** in total running costs compared to the standard versions.
- ✓ In summary, **Energy** models offer unsurpassed **cost-efficiency and operation comfort** by significantly reducing steam emission.

Maximum service friendliness

UC Series supports maximum service friendliness:

- ✓ Material and components are made of **very high quality**.
- ✓ **3-year warranty** for bus cable, control system and optional integrated water softener.
- ✓ **Best accessibility** to all service relevant components via individually removable side panels and optimized positions of parts.
- ✓ **Menu-driven commissioning** helps to define the machine step by step.
- ✓ **Multiphase design** simplifies machine installation. Machines are adaptable to different current types on-site.
- ✓ Easy **customization of wash programmes** by technicians, to meet customers' unique dishwashing needs.
- ✓ Due to self-explaining symbols, the user-friendly **error management system** indicates important errors, which can be easily solved by the operator.
- ✓ Extensive **error data log** provides useful notes for service technicians, facilitates trouble-shooting.
- ✓ Integrated **actuator function** enables fast error testing and identification by technicians, reducing down time.
- ✓ Smooth machine interior and exterior surfaces, plus easily removable wash systems and filters, simplify manual cleaning.

Best washing results

UC Series offers the best washing results:

- ✓ **VarioPower** : The two revolutionary wash fields ensure **uniform coverage and dishwashing power** from above and below.
- ✓ **High-performance hygiene tank heater**: ensures stable tank temperatures and easy manual cleaning.
- ✓ **Unique 4-fold filtration system**: consists of a flat strainer, filter cylinder, pump inlet filter and Mediamat. This keeps the tank water hygienically clean for more wash cycles and significantly lower running costs.
- ✓ **Sediment sensor** monitors the quality of the tank water automatically, and if necessary, would initiate a step by step regeneration during wash cycles.
- ✓ **Intensive programmes**: clean even heavily dried-on residues.
- ✓ All factors ensuring a good wash result are adjustable in respect of the different types of wash items and the degree of soiling. This **guarantees very good wash results and an optimum protection of wash items at all times.**
- ✓ The new UC Series was tested along with other manufacturers' dishwashers by the LGA (TÜV Rheinland, Germany), an independent testing institute, and has been certified to **deliver the best dishwashing results in the under counter dishwasher class.**

→ Technical data

Machine capacity - by different types of applications

Technical Data		Glass	Dish	Bistro Items	Cutlery
Theoretical capacity, washing programs 1/2/3	(racks/hr.)	22/32/48	40/28/24	40/32/28	11
Short programs	(racks/hr.)	77	65	66	21
Rinse water requirement per cycle*	(l)	2.4	2.4	2.4	3.4
Rinse temperature	(°C)	65	85	65-85	85
Tank temperature	(°C)	62	62	62	66

* Under ideal conditions. The rinse water consumption depends on circumstances at the customer's premises. Fine adjustment is made at commissioning.

Technical data – by different machine sizes

Technical Data	UC-S	UC-M	UC-L	UC-XL
Number of programmes (racks/hr.)	up to 3 (+ special programmes)			
Theoretical Capacity ¹ (racks/hr.)	See above table			
Width (mm)	460	600	600	600
Depth
